## **Summer is winding Down!**

Owning a pool is a huge investment. It is up to you, as the trusted caretaker of that investment, to make sure their investment is preserved properly.

It is time to start getting your customers pool ready for the cold winter months. As you know properly winterized pools will protect the equipment from ice damage, keep the water clean and save time and money when opening the pool back up in the spring.

As your trusted supplier **Hatchik's** is ready to support you with all the materials you need to get the job done.

## Fall 2021 Poly 60 Based Winterizing Compare to any 60% Poly Algaecide Program

1. Add one liter of Care Free brand enzymes winterizer to 30,000 gallons of water. Remains until next summer.
2. Add 3 quarts Poly 60 to prevent algae\*. (A4856 Qts or A4857 Gal.)
3. Add 3 Qts Winter Stain Preventer (A4878) or All Chlor Stain Preventer (A4501).
4. Tie a floating chlorine tablet feeder (C1071, C1072, C1075, C1082) to each skimmer with a 5-10' cord. Fill with 1" or 3" stabilized trichlor tablets.
5. Add 2 oz per 10,000 gallons of SEA-KLEAR PHOSKLEAR 4000 Phosphate Control. (A7146 – 30.84 QT.)

### Dosage per 30,000 Gallons

**\*60% Poly Algaecide dosage is for 'open'/mesh pools. For covered pools use 2 qts of Poly 60.**

**Fall 2021 Copper Based Winterizing  
(Compare to any Copper based program)**

1. Treat pools with a combination of Copper "7" and Poly 60 (60% Poly Algaecide).
2. Dosage is 1qt of Copper and 1 qt of Poly 60 for 30,000 gallons.
3. Copper algaecide should be diluted with water before adding to the pool.
4. For best results, add chemicals with the circulation system running. With the system off we suggest spraying with a garden sprayer on a non-windy day, one chemical at a time. (never mix chemicals!)
5. Add 3 Qts Winter Stain Preventer (A4878 or A4501).
6. Tie a floating chlorine tablet feeder (C1071,C1072,C1075,C1082) to each skimmer with a 5-10' cord. Fill with 1" or 3" stabilized trichlor tablets.
7. Use enzymes that breakdown the outer shell of algae to help with the algae destroying process.
8. Add 2 oz per 10,000 gallons of SEA-KLEAR PHOSKLEAR 4000 Phosphate Control. (A7146 – 30.84 QT.)

**Dosage Per 30,000**

## Fall 2021 Quat 50 Based Winterizing Compare to any 50% Quat Algaecide Program

1. Add one liter of Care Free brand enzyme winterizer to 30,000 gallons of water.
2. Add 8 quarts of Quat 50 (A4860) to kill algae\*. Make sure when you add the 50% you walk around the perimeter of the pool and pour it close to the walls. With this system you want the quat to coat the walls so the broadcasting close to the walls is important.
3. Add 3 Qts Winter Stain Preventer (A4878) or All Chlor Stain Preventer (A4501).
4. Tie a floating chlorine tablet feeder(C1071,C1072,C1075,C1082) to each skimmer with a 5-10' cord. Fill with 1" or 3" stabilized trichlor tablets.
5. Add 2 oz per 10,000 gallons of SEA-KLEAR PHOSKLEAR 4000 Phosphate Control. (A7146 – 30.84 QT.)

\*Enzyme treatment is extremely important when using quat based algaecides to prevent 'bathtub ring' which is likely to happen with quat treated pools.
